Hon. Jerry Olaier
Punong Barangay
Barangay Hall, Poblacion
Guipos, Zamboanga del Sur

Dear Sir/Maam:

I am writing to formally apply for the IT Support position or any equivalent entry-level post in your esteemed office that matches my qualifications. As a dedicated and hardworking BSIT student at J.H. Cerilles State College with a strong foundation in hardware troubleshooting, computer systems servicing, and software support along with technical skills in programming and web development (HTML, CSS, JavaScript) I am eager to apply my practical expertise and problem-solving abilities to your local government unit.

During my professional background, I spent two years working at the Department of Education (DepEd), where I gained valuable hands-on experience handling computer troubleshooting, diagnosing hardware malfunctions, and performing regular system maintenance. This practical exposure allowed me to sharpen my technical skills, resolve real-world IT issues efficiently, and ensure the smooth, continuous operation of office computer systems.

I am confident that my academic preparation, work background, and dedication to public service will enable me to perform the duties and responsibilities required of the position effectively. I am fully committed to undergoing any necessary training and dedicated to performing my duties with utmost efficiency once hired.

Attached herewith are my resume, certificate of employment, and other documentary requirements for your reference. I would be very grateful for the opportunity to be interviewed at your convenience.

Thank you for your time and kind consideration.

Respectfully yours,

LOUISE VICTOR L. BELLO
